

RevShop Application

Project 1

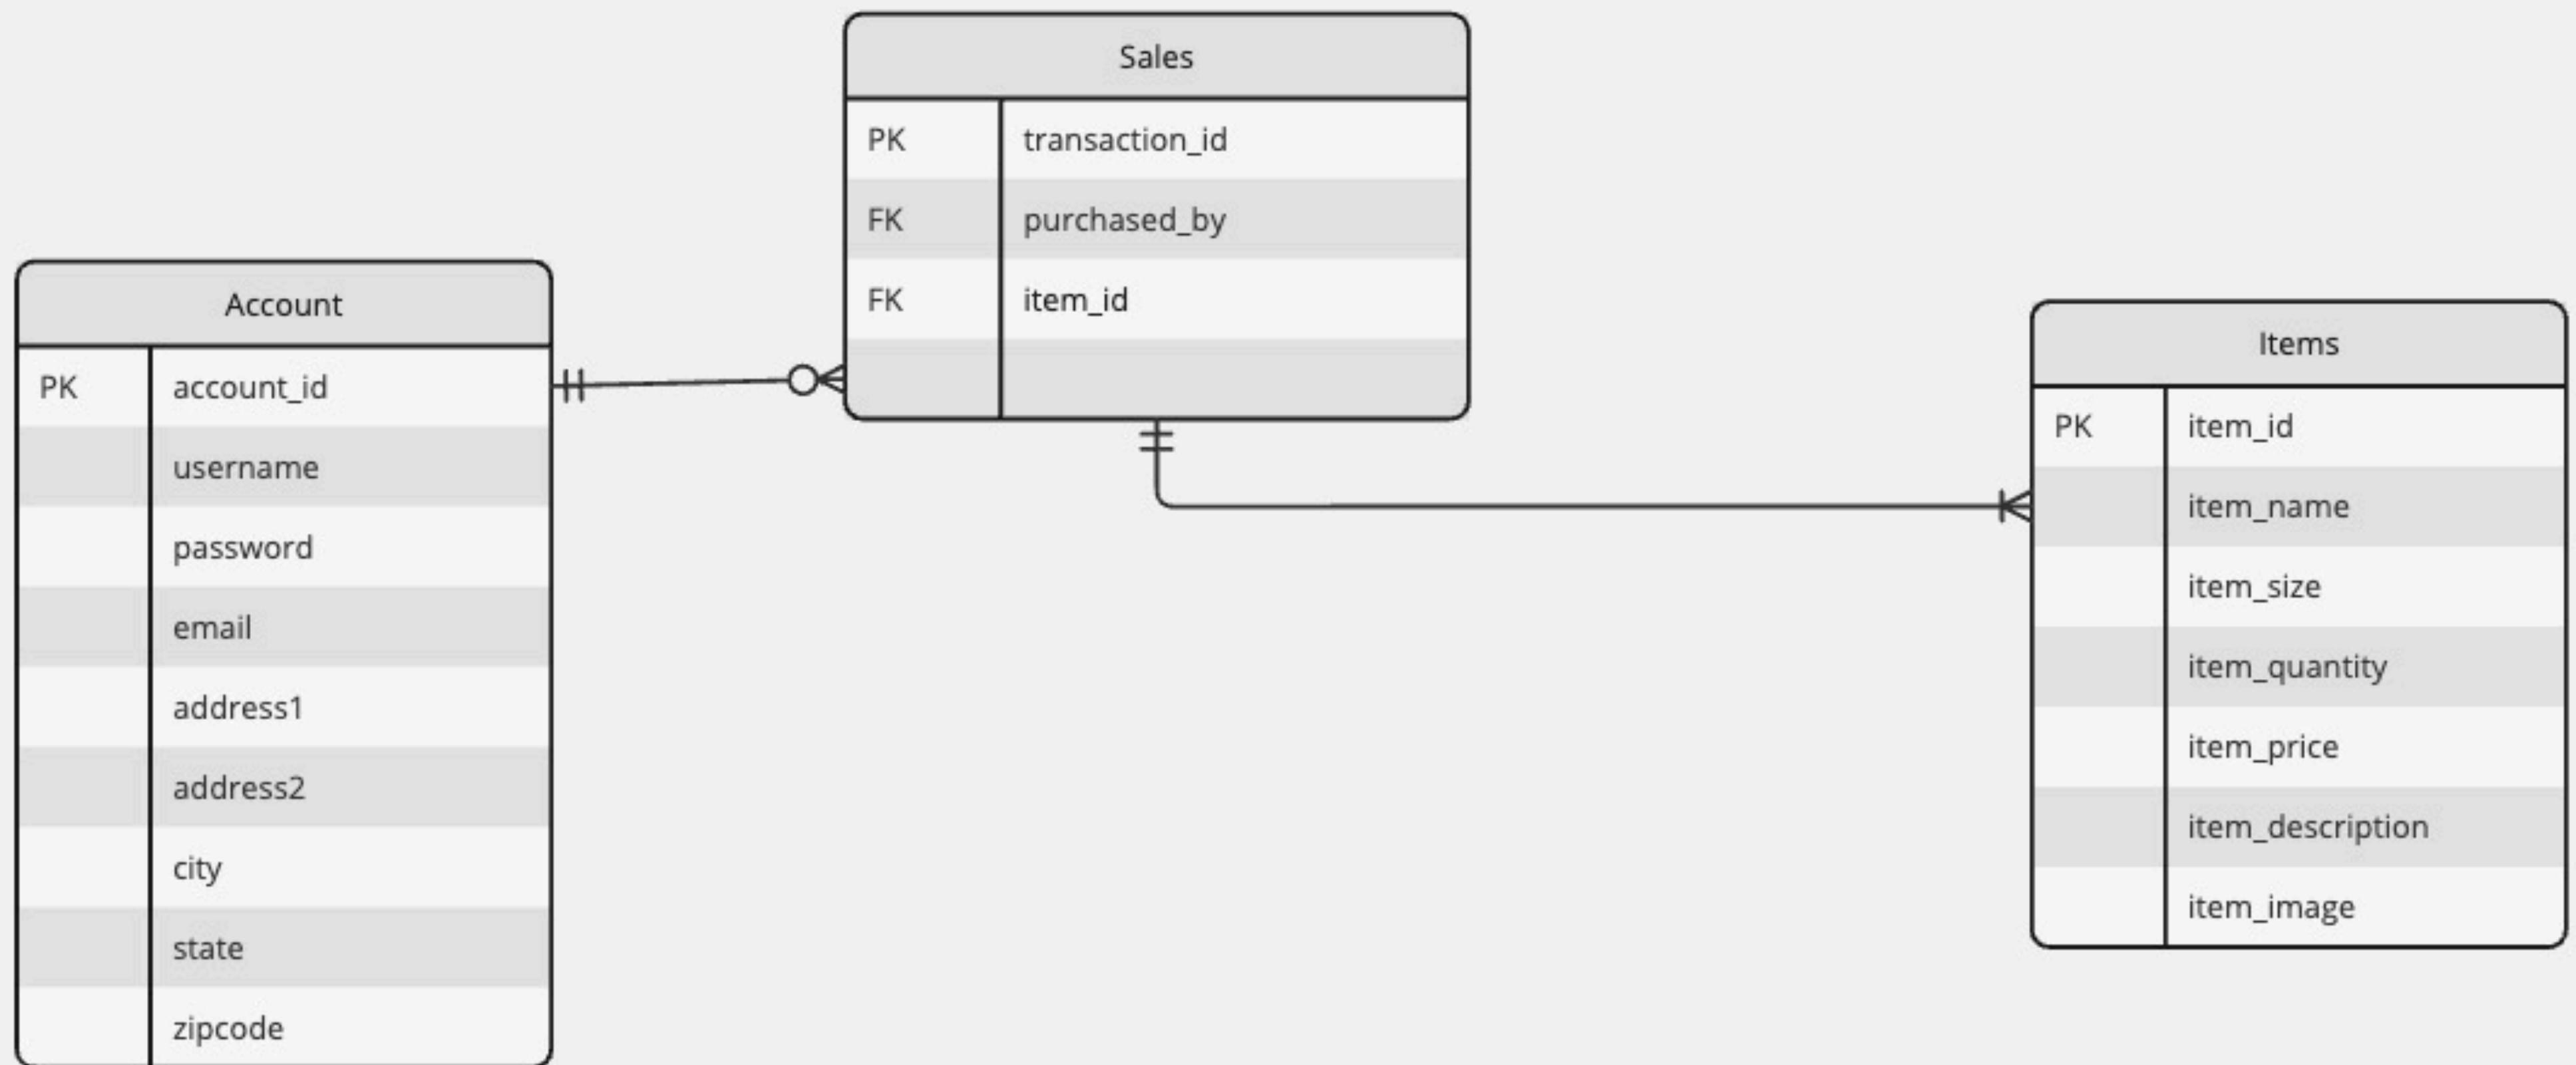

Renee Sevier

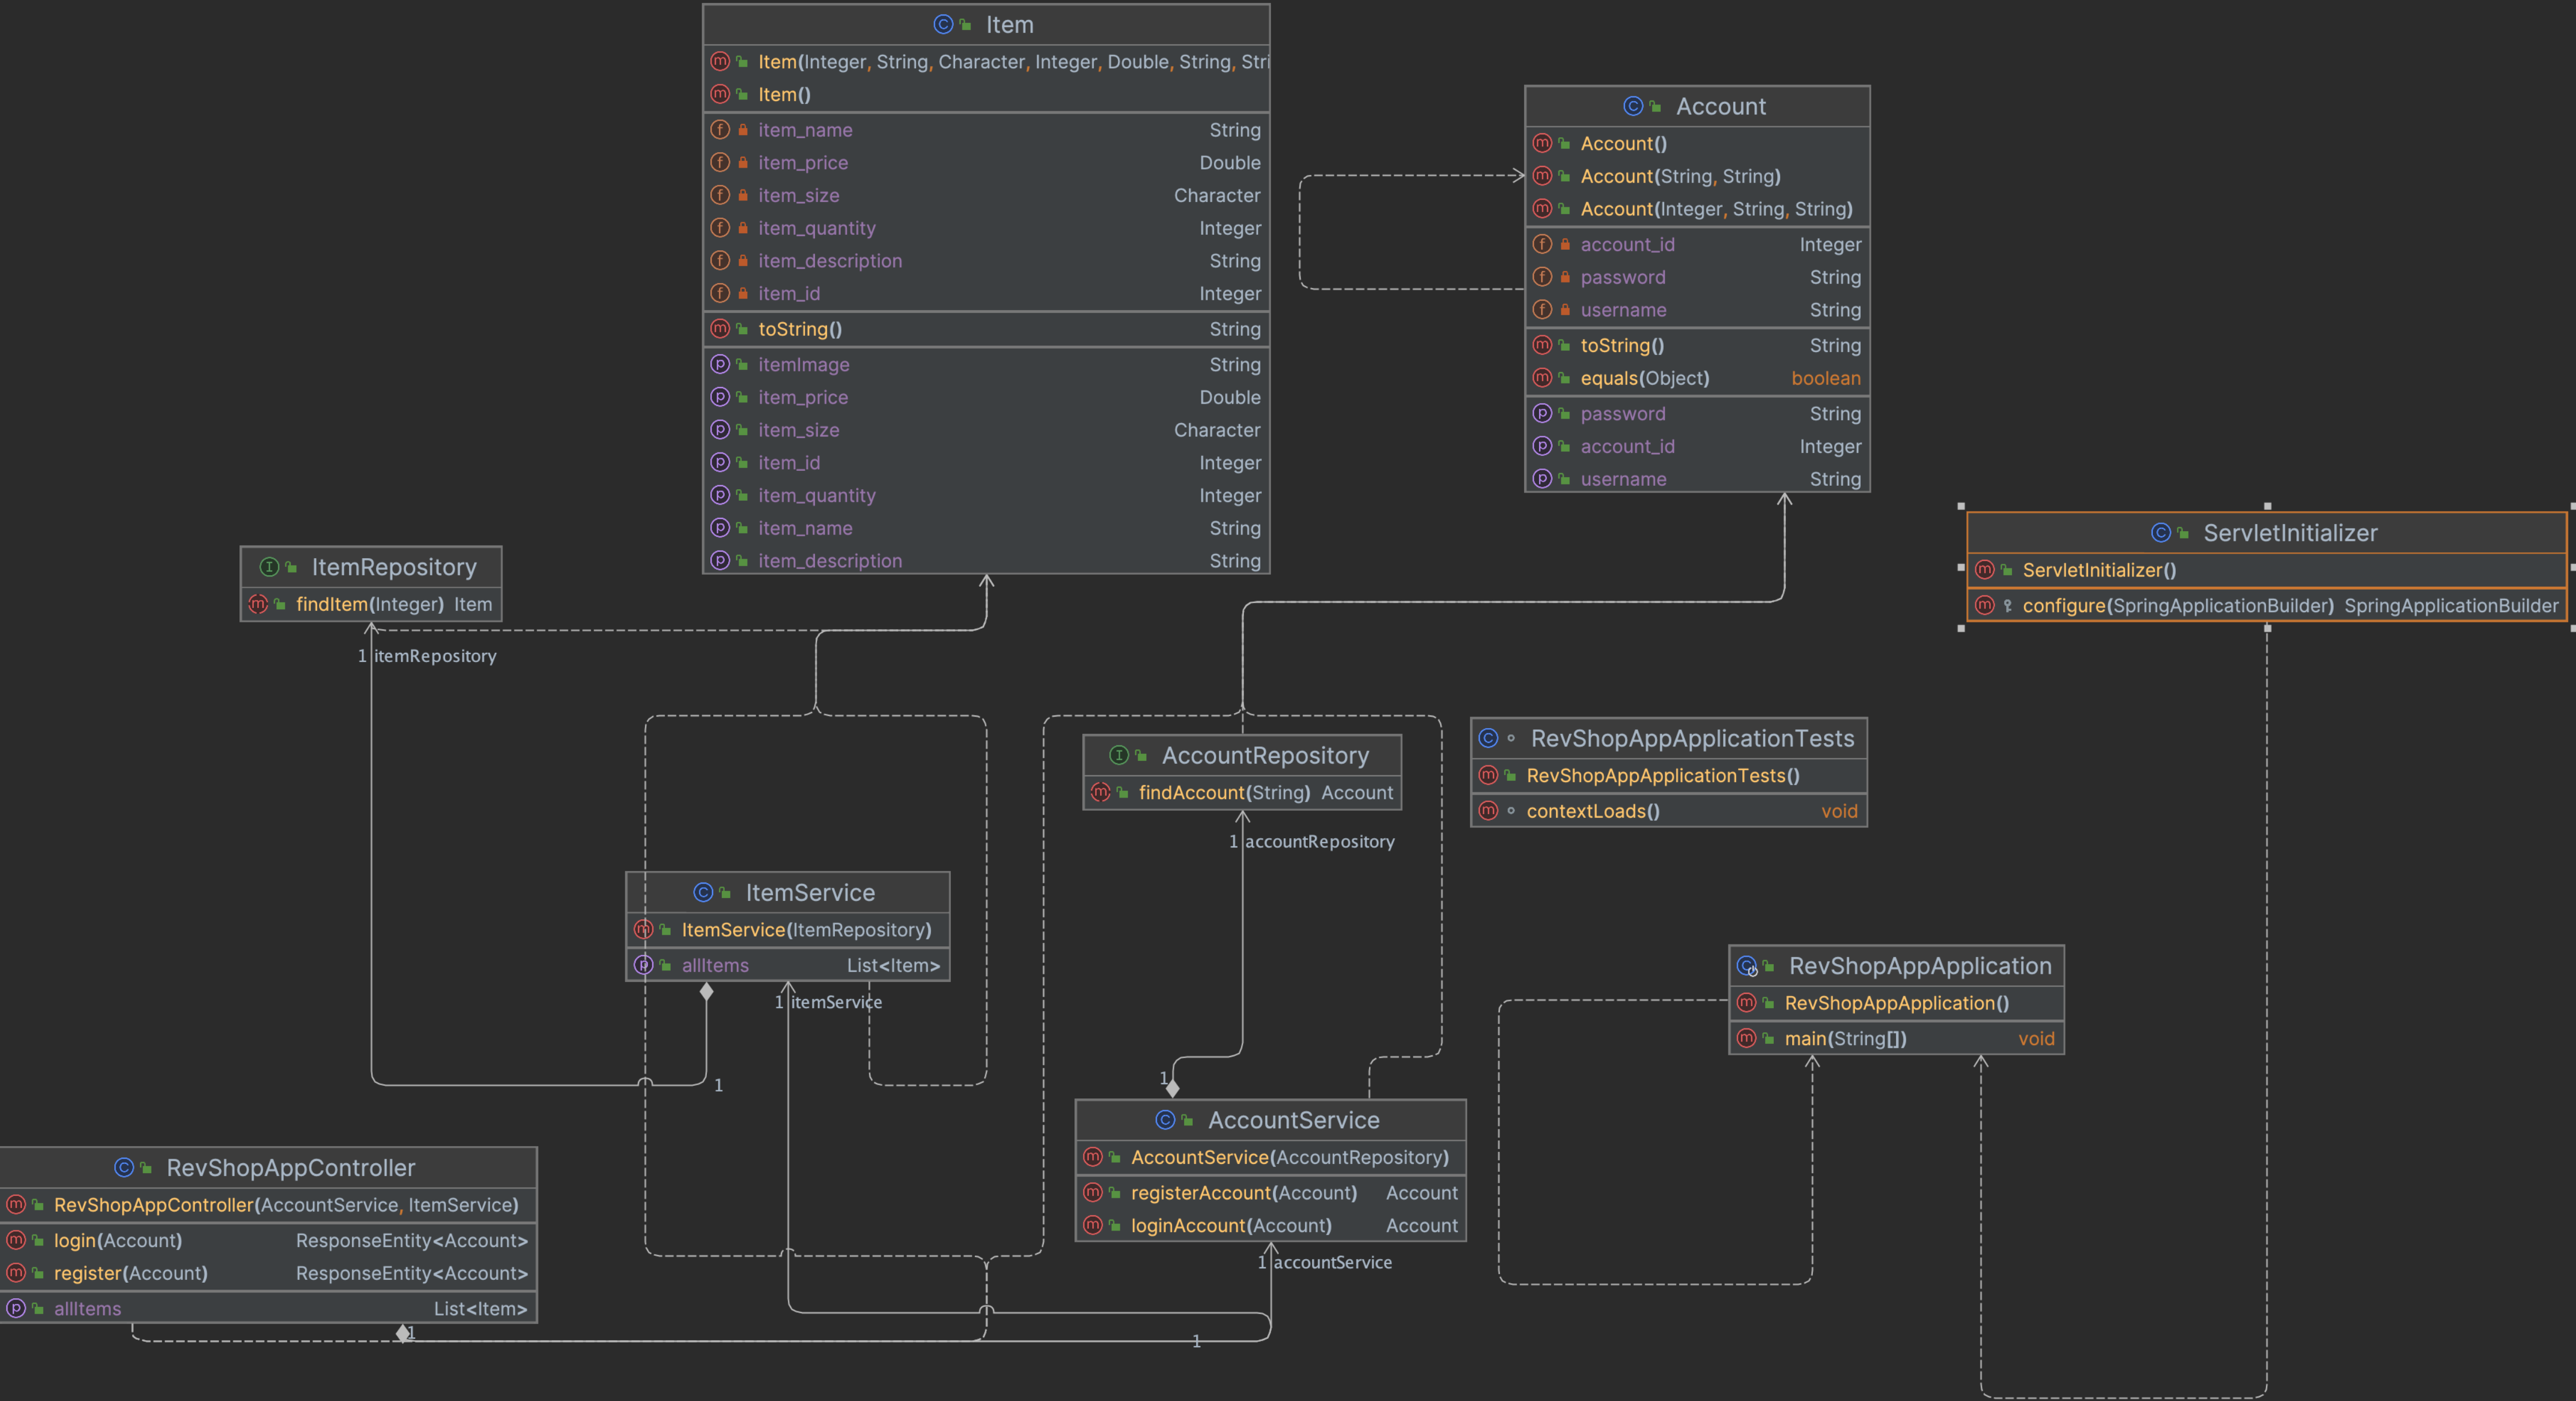

February 21, 2024

Objectives

- Create and design a Full-Stack Web Application for an e-commerce site.
 - Styling: UNIQLO, ETSY, Nothing New
- Application must be functional and user-friendly.
- Technology used:
 - Front-end:
 - CSS, Javascript, HTML
 - Back-end: Spring Boot
 - Java
 - Maven
 - H2 database

RevShop ERD

Features

- Login/ Registration
 - Validation implemented and user information stored
 - Logout
- Product list
 - Details included on homepage
 - Browse and search items
- Items added/remove to cart
- Checkout and submit order with shipping/billing address

Challenges

- Cart, CART! Why is my cart not working?!?!?
- Learned a lot of Javascript
- I like styling!
